SUBJECT INDEX

All papers are indexed once in **bold face** by the first important word in the title. Cross-indexing of papers has been indicated in regular type. Papers have been cross-indexed according to important components of the title.

A

Acquisition of skilled performance, electromyographic evidence of some control factors involved in the , . Richard Herman, 177

Activity, see efficiency of electrical activity

Adductor longus and adductor magnus, role of , in postural movements and in ambulation. David L. Green, and James M. Morris, 223

Ambulation, role of adductor longus and adductor magnus in postural movements and in , . David L. Green, and James M. Morris, 223

Amplifier, inexpensive audio , for bioelectric signals. Robert M. Reinking, and Douglas G. Stuart, 362

Analysis, see feedback analysis

Audio amplifier, inexpensive , for bioelectric signals. Robert M. Reinking, and Douglas G. Stuart, 362

Averaged biceps EMG, effect of wrist rotation on the XY plot of , and isometric tension. D. G. Simons, and E. N. Zuniga, 253

B

Biceps, effect of wrist rotation on the XY plot of averaged , EMG and isometric tension. D. G. Simons, and E. N. Zuniga, 253

Bioelectric signals, inexpensive audio amplifier for , . Robert M. Reinking, and Douglas G. Stuart, 362

Block, see nerve block

Body tracking mechanism, feedback analysis of posture as a , . Karl U. Smith, and Durga S. V. Ramana, 112

Book Notices, 257, 316, 364

C

Chemical, evoked nerve conduction after nerve block by , means. Ernst Fischer, Robert H. Cress, Gerald Haines, Nicholas Panin, and Boris J. Paul, 333

Computers, see new equipment and new products

Conduction, see evoked nerve conduction

Conduction velocity, see nerve conduction velocity

Congress, eleventh world , of the international society for rehabilitation of the disabled (ISRD). Special report. Geraldine L. Dickinson, 163

Contralateral transfer, facilitatory effects of myotatic stretch training upon leg strength and , . Leon E. Smith, 132

Control factors, electromyographic evidence of some , involved in the acquisition of skilled performance. Richard Herman, 177

Control mechanisms, self-generated , in posture. Karl U. Smith, and Robert Arndt, 241

Control of single motor units, influence of training and sex on the isolation and , . Antônio Zappalá, 348

D

Day, see within-day trends

Diagnostic equipment, see new equipment and new products

Disabled, eleventh world congress of the international society for rehabilitation of the , (ISRD). Special report. Geraldine L. Dickinson, 163

Drugs and surgical equipment and supplies, see new equipment and new products

E

Editors note. H. D. Bouman, 1

EEA, efficiency of electrical activity (,) in the muscles of older men. Herbert A. de Vries, and Kenneth C. Lersten, 107

Effect of Wrist Rotation on the XY Plot of Averaged Biceps EMG and Isometric

SUBJECT INDEX

All papers are indexed once in **bold face** by the first important word in the title. Cross-indexing of papers has been indicated in regular type. Papers have been cross-indexed according to important components of the title.

A

Acquisition of skilled performance, electromyographic evidence of some control factors involved in the , . Richard Herman, 177

Activity, see efficiency of electrical activity

Adductor longus and adductor magnus, role of , in postural movements and in ambulation. David L. Green, and James M. Morris, 223

Ambulation, role of adductor longus and adductor magnus in postural movements and in , . David L. Green, and James M. Morris, 223

Amplifier, inexpensive audio , for bioelectric signals. Robert M. Reinking, and Douglas G. Stuart, 362

Analysis, see feedback analysis

Audio amplifier, inexpensive , for bioelectric signals. Robert M. Reinking, and Douglas G. Stuart, 362

Averaged biceps EMG, effect of wrist rotation on the XY plot of , and isometric tension. D. G. Simons, and E. N. Zuniga, 253

B

Biceps, effect of wrist rotation on the XY plot of averaged , EMG and isometric tension. D. G. Simons, and E. N. Zuniga, 253

Bioelectric signals, inexpensive audio amplifier for , . Robert M. Reinking, and Douglas G. Stuart, 362

Block, see nerve block

Body tracking mechanism, feedback analysis of posture as a , . Karl U. Smith, and Durga S. V. Ramana, 112

Book Notices, 257, 316, 364

C

Chemical, evoked nerve conduction after nerve block by , means. Ernst Fischer, Robert H. Cress, Gerald Haines, Nicholas Panin, and Boris J. Paul, 333

Computers, see new equipment and new products

Conduction, see evoked nerve conduction

Conduction velocity, see nerve conduction velocity

Congress, eleventh world , of the international society for rehabilitation of the disabled (ISRD). Special report. Geraldine L. Dickinson, 163

Contralateral transfer, facilitatory effects of myotatic stretch training upon leg strength and , . Leon E. Smith, 132

Control factors, electromyographic evidence of some , involved in the acquisition of skilled performance. Richard Herman, 177

Control mechanisms, self-generated , in posture. Karl U. Smith, and Robert Arndt, 241

Control of single motor units, influence of training and sex on the isolation and , . Antônio Zappalá, 348

D

Day, see within-day trends

Diagnostic equipment, see new equipment and new products

Disabled, eleventh world congress of the international society for rehabilitation of the , (ISRD). Special report. Geraldine L. Dickinson, 163

Drugs and surgical equipment and supplies, see new equipment and new products

E

Editors note. H. D. Bouman, 1

EEA, efficiency of electrical activity (,) in the muscles of older men. Herbert A. de Vries, and Kenneth C. Lersten, 107

Effect of Wrist Rotation on the XY Plot of Averaged Biceps EMG and Isometric

Tension. D. G. Simons, and E. N. Zuniga, 253
Effects, see facilitatory effects
Efficiency of Electrical Acivity (EEA) in the Muscles of Older Men. Herbert A. de Vries, and Kenneth C. Lersten, 107
Electromedical equipment, see new equipment and new products
Electromyogram, effect of wrist rotation on the XY plot of averaged biceps , and isometric tension. D. G. Simons, and E. N. Zuniga, 253
see efficiency of electrical activity
Electromyographic Evidence of some Control Factors Involved in the Acquisition of Skilled Performance. Richard Herman, 177
Electromyographic signals, filtering of , . G. L. Gottlieb, and G. C. Agarwal, 142
Electronic Designs, 142, 192, 362
Filtering of electromyographic signals. G. L. Gottlieb, and G. S. Agarwal, 142
Inexpensive audio amplifier for bioelectric signals. Robert M. Reinking, and Douglas G. Stuart, 362
Quantitative method to measure the relationship between prosthetic gait and the forces produced at the stump-socket interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
Eleventh World Congress of the International Society for Rehabilitation of the Disabled (ISRD). Special Report. Geraldine L. Dickinson, 163
Equipment, see new equipment and new products
Evidence, see electromyographic evidence
Evoked Nerve Conduction after Nerve Block by Chemical Means. Ernst Fischer, Robert H. Cress, Gerald Haines, Nicholas Panin, and Boris J. Paul, 333
Exercise, see control of single motor units
see myotatic stretch training
see skilled performance

F

Facilitatory Effects of Myotatic Stretch Training upon Leg Strength and Contralateral Transfer. Leon E. Smith, 132
Factors, see control factors
Feedback Analysis of Posture as a Body Tracking Mechanism. Karl U. Smith, and Durga S. V. Ramana, 112
Females, within-day trends of motor latency and nerve conduction velocity in males and , . Waneen Wyrick, and Ann Duncan, 307
Filtering of Electromyographic signals. G. L. Gottlieb, and G. C. Agarwal, 142
Forces, quantitative method to measure the relationship between prosthetic gait and the , produced at the stump-socket interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
Function, see control of single motor units
see efficiency of electrical activity
see feedback analysis of posture
see head and shoulder girdle linkage
see immediate post-surgical prosthetics
see myotatic stretch training
see postural movements
see posture
see prosthetic gait
see skilled performance

G

Gait, quantitative method to measure the relationship between prosthetic , and the forces produced at the stump-socket interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
General laboratory equipment, see new equipment and new products
Generated, see self-generated control mechanisms
Girdle, see shoulder girdle

H

Handicapped, see disabled
Head and Shoulder Girdle Linkage. Joan C. Waterland, and Georgia M. Shambes, 279

I

Immediate Post-Surgical Prosthetics: Rehabilitation Aspects. John J. Gerhardt, Philip S. King, George A. Peirson, Everill W. Fowlks, and Dean C. Altman, 3
Inexpensive Audio Amplifier for Bioelec-

XUM

tric Signals, Robert M. Reinking, and Douglas G. Stuart, 362

Influence of Training and Sex on the Isolation and Control of Single Motor Units. Antônio Zappalá, 348

Interface, see stump-socket interface

International society, eleventh world congress of the , for rehabilitation of the disabled (ISRD). Special report. Geraldine L. Dickinson, 163

Isolation and control of single motor units, influence of training and sex on the , . Antônio Zappalá, 348

Isometric tension, effect of wrist rotation on the XY plot of averaged biceps EMG and , . D. G. Simons, and E. N. Zuniga, 253

ISRD, eleventh world congress of the international society for rehabilitation of the disabled (,). Special report. Geraldine L. Dickinson, 163

Issue, see special issue

L

Laboratory equipment, see new equipment and new products

Latency, see motor latency

Leg strength, facilitatory effects of myotatic stretch training upon , and contralateral transfer. Leon E. Smith, 132

Linearly rising muscle stretch, motoneuron responses to , . S. Homma, K. Ishikawa, and D. C. Stuart, 290

Linkage, head and shoulder girdle , . Joan C. Waterland, and Georgia M. Shambes, 279

Longus, see adductor longus

M

Magnus, see adductor longus and adductor magnus

Males, within-day trends of motor latency and nerve conduction velocity in , and females. Waneen Wyrick, and Ann Duncan, 307

Measurement, see quantitative method to measure

Mechanism, see body tracking mechanism
see control mechanisms

Men, see older men

Method, see quantitative method

Microscopes, see new equipment and new products

Miscellaneous equipment, see new equipment and new products

Motoneuron Responses to Linearly Rising Muscle Stretch. S. Homma, K. Ishikawa, and D. G. Stuart, 290

Motor latency, within-day trends of , and nerve conduction velocity in males and females. Waneen Wyrick, and Ann Duncan, 307

Motor units, influence of training and sex on the isolation and control of single , . Antônio Zappalá, 348

Movement, see efficiency of electrical activity
see postural movements
see skilled performance

Muscle, see adductor longus and adductor magnus
see isometric tension
see motor latency
see single motor units
see skilled performance

Muscles, efficiency of electrical activity (EEA) in the , of older men. Herbert A. de Vries, and Kenneth C. Lersten, 107

Muscle stretch, motoneuron responses to linearly rising , . S. Homma, K. Ishikawa, and D. G. Stuart, 290

Myotatic stretch training, facilitatory effects of , upon leg strength and contralateral transfer. Leon E. Smith, 132

N

Nerve block, evoked nerve conduction after , by chemical means. Ernst Fischer, Robert H. Cress, Gerald Haines, Nicholas Panin, and Boris J. Paul, 333

Nerve conduction velocity, within-day trends of motor latency and , in males and females. Waneen Wyrick, and Ann Duncan, 307

New electronic designs, see electronic designs

New Equipment and New Products, 147, 204, 265, 324
Computers, 153, 213
Diagnostic equipment, 148, 206, 267, 325
Drugs and surgical equipment and supplies, 215
Electromedical equipment, 147, 204, 265, 324

General laboratory equipment, 153, 212, 270, 327
Miscellaneous equipment, 154, 216, 273, 328
Optical equipment and microscopes, 214, 271
Rehabilitation equipment, 151, 210, 269, 326
New Products, see new equipment and new products
News Notes, 155, 218, 274, 329
Note, see editors note
Notes, see news notes
Notices, see book notices

O

Older men, efficiency of electrical activity (EEA) in the muscles of , . Herbert A. de Vries, and Kenneth C. Lersten, 107
Optical equipment and microscopes, see new equipment and new products

P

Performance, electromyographic evidence of some control factors involved in the acquisition of skilled , . Richard Herman, 177
Plot, see XY plot
Post-surgical prosthetics, immediate , : rehabilitation aspects. John J. Gerhardt, Philip S. King, George A. Peirson, Everill W. Fowlks, and Dean C. Altman, 3
Postural movements, role of adductor longus and adductor magnus in , and in ambulation. David L. Green, and James M. Morris, 223
Posture, feedback analysis of , as a body tracking mechanism. Karl U. Smith, and Durga S. V. Ramana, 112
self-generated control mechanisms in , . Karl U. Smith, and Robert Arndt, 241
Products, see new equipment and new products
Prosthetic gait, quantitative method to measure the relationship between , and the forces produced at the stump-socket interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
Prosthetics, immediate post-surgical , : rehabilitation aspects. John J. Gerhardt, Philip S. King, George A. Peirson, Everill W. Fowlks, and Dean C. Altman, 3

Q

Quantitative Method to Measure the Relationship between Prosthetic Gait and the Forces Produced at the Stump-Socket Interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192

R

Rehabilitation, eleventh world congress of the international society for , of the disabled (ISRD). Special report. Geraldine L. Dickinson, 163
immediate post-surgical prosthetics: , aspects. John J. Gerhardt, Philip S. King, George A. Peirson, Everill W. Fowlks, and Dean C. Altman, 3
see control of single motor units
see myotatic stretch training
see nerve block
see prosthetic gait
see skilled performance
Rehabilitation equipment, see new equipment and new products
Relationship, quantitative method to measure the , between prosthetic gait and the forces produced at the stump-socket interface. Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
Report, see special report
Responses, see motoneuron responses
Rising muscle stretch, motoneuron responses to linearly , . S. Homma, K. Ishikawa, and D. G. Stuart, 290
Role of Adductor Longus and Adductor Magnus in Postural Movements and in Ambulation. David L. Green, and James M. Morris, 223
Rotation, see wrist rotation

S

Self-Generated Control Mechanisms in Posture. Karl U. Smith, and Robert Arndt, 241
Sex, influence of training and , on the iso-

XUM

lation and control of single motor units. Antônio Zappalá, 348
Shoulder girdle, head and , linkage Joan C. Waterland, and Georgia M. Shambes, 279
Signals, see bioelectric signals
see electromyographic signals
Single motor units, influence of training and sex on the isolation and control of , . Antônio Zappalá, 348
Skilled performance, electromyographic evidence of some control factors involved in the acquisition of , . Richard Herman, 177
Society, see international society
Socket, see stump-socket interface
Special Issue, 1
Immediate post-surgical prosthetics: rehabilitation aspects. John J. Gerhardt, Philip S. King, George A. Peirson, Everill W. Fowlks, and Dean C. Altman, 3
Special Report, 163
Eleventh world congress of the international society for rehabilitation of the disabled (ISRD). Geraldine L. Dickinson, 163
Strength, see leg strength
Stretch, see muscle stretch
Stretch training, see myotatic stretch training
Stump-socket interface, quantitative method to measure the relationship between prosthetic gait and the forces produced at the , . Lewis A. Leavitt, Charles R. Peterson, Joseph Canzoneri, Ricardo Paz, A. L. Muilenburg, and V. Thomas Rhyne, 192
Surgical equipment and supplies, see new equipment and new products
Surgical prosthetics, see immediate post-surgical prosthetics

T

Tension, see isometric tension
Tracking mechanism, feedback analysis of posture as a body , . Karl U. Smith, and Durga S. V. Ramana, 112
Training, facilitatory effects of myotatic stretch , upon leg strength and contralateral transfer. Leon E. Smith, 132
influence of , and sex on the isolation and control of single motor units. Antônio Zappalá, 348
Transfer, see contralateral transfer
Trends, see within-day trends

U

Units, see motor units

V

Velocity, see nerve conduction velocity

W

Within-Day Trends of Motor Latency and Nerve Conduction Velocity in Males and Females. Waneen Wyrick, and Ann Duncan, 307
World congress, see eleventh world congress
Wrist rotation, effect of , on the XY plot of averaged biceps EMG and isometric tension. D. G. Simons, and E. N. Zuniga, 253

X

XY plot, effect of wrist rotation on the , of averaged biceps EMG and isometric tension. D. G. Simons, and E. N. Zuniga, 253

Statement of Ownership, Management and Circulation required by the Act of October 23, 1962; Section 4369, Title 39, United States Code.

1. *Date of Filing:* October 1, 1970.
2. *Title of Publication:* American Journal of Physical Medicine.
3. *Frequency of Issue:* Bi-monthly.
4. *Location of Known Office of Publication:* 428 E. Preston St., Baltimore, Md. 21202.
5. *Location of the Headquarters or General Business Offices of Publisher:* 428 E. Preston St., Baltimore, Md. 21202.
6. *Publisher:* The Williams & Wilkins Co., 428 E. Preston St., Baltimore, Md. 21202.

Editor: Dr. H. D. Bouman, P.O. Box 3853, Station B, 5227 E. Second St., Long Beach, Calif. 90803.

7. *Owner:* (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given.) The Williams & Wilkins Co., 428 E. Preston St., Baltimore, Md. 21202; Waverly Press, Inc., Mt. Royal and Guilford Avenues, Baltimore, Md. 21202; E. M. Passano, 3925 Linkwood Road, Baltimore, Md. 21210; W. M. Passano, Gibson Island, Md. 21056; C. M. Fick, 2622 Wendover Road, Baltimore, Md. 21234; C. F. Hagan, 1707-E Waverly Way, Baltimore, Md. 21212; W. M. Passano, Jr., Gibson Island, Md. 21056; S. P. Macfarlane, 303 St. Dunstans Road, Baltimore, Md. 21212; E. M. Passano, Jr., 3925 Linkwood Road, Baltimore, Md. 21210; C. A. Smith, R.F.D. #4, Easton, Md. 21601; The Passano Foundation, Inc., 428 E. Preston St., Baltimore, Md. 21202.

8. *Known bondholders, mortgages and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities are:* None.

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in Paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 percent or more of the total amount of the stock or securities of the publishing corporation.

	(a)*	(b)†
10. A. Total No. Copies Printed (Net Press Run)	2651	2515
B. Paid Circulation		
1. To term subscribers by mail, carrier delivery or by other means	1706	1705
2. Sales through agents, news dealers or otherwise	—	—
C. Free Distribution (including samples), by mail, carrier delivery or by other means	60	63
D. Total No. of Copies Distributed	1766	1768

* Average number of copies for each issue during preceding 12 months.

† Single issue nearest to filing date.

I certify that the statements made by me above are correct and complete. (Signed) Mary G. MacIsaac, Publisher.
